BRAUN GERMANY ®
BRAUN NovoScan LCD
NEWS

With a resolution of 5 megapixel and an extremely fast scan time of 1 second for a scan, the Braun **NovoScan LCD** provides top quality scans.
The scanner is PC independent; it is not possible to scan via PC.
Due to the supplied batteries or AC adapter, the scanner can be used anywhere. The scanned images are stored on a SD/SDHC card (not included) and can be viewed on the 2.4" LCD Display immediately.
Negatives are automatically converted into positives. Using the USB cable, it is possible to read the scans on the PC and if desired edit them with the supplied editing program. Also a view on TV is possible.
By using the film and slide holder you achieve scan efficiency and also save time.
